## UV LIGHT METER 365

Digital UV Meter – MAGNATEST UV-365

---

The MAGNATEST UV-365 is a compact, lightweight, and portable digital UV meter designed for accurate measurement of ultraviolet light. Ideal for both laboratory and field applications, it offers high precision, user-friendly operation, and reliable performance for NDT (Non-Destructive Testing), material inspection, and other industrial uses.

### KEY FEATURES

- Compact, lightweight, and portable design for easy field use.
- High accuracy with dual range selection for versatile measurements.
- Battery-operated for convenient use in lab and field environments.
- Clear, easy-to-read 3½ digit digital display with high resolution.
- Reliable sensor ensures stable UV response over time.
- Suitable for NDT, material testing, quality control, and research labs.

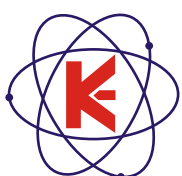

## TECHNICAL SPECIFICATIONS

Parameter	Specification
Power Supply	9V DC battery operated
Accuracy	±1% of full-scale reading
Display	3½ digit digital display
Sensor Size	10 mm diameter
Frequency Range	0–300 Hz
Measurement Range	Dual range selectable
Operating Temperature	0°C – 40°C

## STANDARD ACCESSORIES

- Carrying case for safe handling and portability.
- User manual with calibration and operating instructions.
